Education

Bachelor of Science in Computer Science

Seattle University | Seattle, WA

September 2023 - June 2026

- **GPA:** 3.86
- **Awards:** Dean's List for 7 Quarters, President's List for 1 Quarter
- **Classes:** Linear Algebra, Design & Analysis of Algorithms, Object Oriented Programming, Artificial Intelligence, Fundamentals of Databases, Web Development, Computer Graphics, Graphics / Game Project

Associates of Arts

Olympic College | Bremerton, WA

September 2021 - June 2023

- **GPA:** 3.9
- **Awards:** President's Scholar for 5 Quarters, Dean's List for 1 Quarter

Projects

NASA Web Game: Corebound | [Link](#)

September 2025 - June 2026

- Gamified NASA's Psyche Mission into a web-based, single player, 2D game to generate public interest and provide education and entertainment to all ages
- Collaborating with NASA's Psyche Mission and 3 other Computer Science students in yearlong capstone project
- Unity with C#, AGILE, GitHub, Unity with C#, and Unity Testing Framework

One Way Out | github.com/shamithap/OneWayOut

April 2026 - June 2026

- Formulated a single player, 2D puzzle game featuring animation, audio, and navigation/pathfinding to create a challenging and replayable experience for users
- Collaborating with 3 other Computer Science students in quarter long project
- Godot with GDScript, Kanban, and GitHub

Map Scribe | github.com/abbyhayd/HackSU2026

January 2026

- Created an Android app within a 24-hour period that tracks the user's location to display it on a map and allows the user to create journal entries and store them in a client-side database
- Partnered with another Computer Science student
- Java in Android Studio, Google Maps SDK for Android API, Room Persistence Library, and SQLite

Game Stats Discord Bot | github.com/abbyhayd/GameStatsBot

November 2025

- Configured a Discord bot that returns player stats for specific games when prompted on Discord
- Independently researched and programmed a Discord bot
- Python, GitHub, Fortnite API, Discord.py API, and Discord Dev

Protect the Planet | abbydoorknob.itch.io/protect-the-planet

December 2024

- Fabricated a single player, top-down shooter game showcasing waves of enemies and an upgrade menu between waves
- Independently devised within a 72-hour period where you play as a planet protecting yourself by shooting incoming meteors
- Earned a ranking of 35 out of 101 overall
- Godot with GDScript

Experience

Seattle University Research Assistant | github.com/abbyhayd/aging-model

Summer 2025

- Devised an individual based simulation modeling aging and damage in unicellular organisms
- Worked with Dr. Michael Zanis as his assistant
- JavaScript and HTML

Skills

- **Languages:** Python, C++, C#, GDScript, JavaScript
- **Developer Tools and Frameworks:** Godot, Github, VSCode, Unity, Visual Studio, CLion, Express.js, React
- **Soft skills:** AGILE development, RESTful API, critical thinking, collaboration, problem solving, enthusiasm, organization, planning, adaptability
